He then bans me once while im muted and cannot speak. If I did something that deserves only a mute...why would you randomly ban me while im muted? What could I say wrong while I literally am silenced? And then you want to say its not targeted?

Please explain why in your screenshots we can clearly see you muted me and then banned me 30-40 minutes later (on two different accounts) while I couldn't speak?

You just banned me twice randomly while I was forced to be silent?

And then you want to say it's not targeted?
